I don't want her sidetracked. Skip the r6 trend .

I will work w Meghan getting the updated r8 trend

MY GOD, there is some cluster requests.

Hold off on that R6 trend stuff. I apologize.

I learned a good lesson today.

Sorry that was not the solution email you were looking for.

What we can do as a stop gap prior to getting them in the viewer is run them as the pdfs for distribution on the validated data for r6 and r9. So everyone has what they want. Let me know if I need to make this happen

So everyone is on the same page. We are dealing with 4 different labs the original trend graphs were set up to run off of the analytical data from R8 when we run the combine we will see what we need to normalize on the R6 and R9 data to make this happen for all three regions in a clean and quality manor. I am again asking for some time as we have not QA'd our datasets together to make sure all these fun wiz bang tool work on each region.

I have a mental data gap.....

As an FYI this is the email chain from Matt Loesel to Chris
Wagner. These are the samples/locations they are looking for
Trends on. I don't see anything on the r8 viewer and I don't have
access nor the url for the r6 viewer if that's where it resides. I have
taken a look at the scribe project R08_goldking_combo and I
don't see these locations.

This is the data for which we need the trends analysis as early as possible.

Thank you so much for your help

Chris
